CONTENTS

No. 1 (DECEMBER, 1930)

Original Articles:	PAGE
12. The Mineral Requirements of Dairy Cattle. J. A. CRICHTON	1
13. Studies in the Ripening of Cheddar Cheese. L. A. ALLEN	38
14. The Effect of Heat upon the Rennin Coagulation. I. G. M. MOIR	68
15. The Influence of Bacilli of the Colon Group on Cheddar Cheese. H. R. WHITEHEAD	76
16. A Note on the Direct Microscopic Count of Bacteria in Milk. H. R. WHITEHEAD	81
17. Bovine Mastitis. A Short Review of Present Knowledge. F. C. MINETT	84
Abstracts and Reviews:	
Bacteriology	91
General	91
Dairy	95
Chemistry (organic, inorganic and physical)	100
General	100
Dairy	100
Biochemistry	111
Physiology	117
Dairy Husbandry	120
Dairy Industry	123
Statistics	131
Reviews	134
Patents	135

No. 2 (MAY, 1931)

Original Articles: PAGE

18. Starters. S. KNUDSEN 137

19. The Influence of other Bacteria on the Production of Acid by Lactic Streptococci in Milk. G. A. COX and H. R. WHITEHEAD 164

20. Pasteurised Milk for Cheddar Cheese-making. II. The Mineral Content of Cheddar Cheese. G. M. MOIR . . 176

21. The Influence of the Stage of Lactation on the Natural Acidity of Milk. J. HOUSTON 179

22. Methods of Estimation of Salt in Cheese. F. H. McDOWALL and L. A. WHELAN 184

23. Rusty Spot in Cheddar and other Cheese. III. A. T. R. MATTICK, J. G. DAVIS and D. V. DEARDEN . . . 190

24. A Study of *S. paracitrovorus* as a Starter in Butter-making. E. C. G. MADDOCK 203

Abstracts and Reviews:
